

Green, Alvin and Zephaniah.

2th May 1947.

C.

These are two brothers living together. Only one, Alvin, who still at school, was at home when we went. He said he could go to school today as his clothes were being washed. They were being washed by his grandmother -- Mammy Jane. She was an old lady. He did not know her name. Sylvester Green, whose house next door was her son. He was Alvin's uncle.

His father and mother were dead. They were Lionel and Cleina Green. His father had died long ago. He did not remember when his mother had died -- whether it was a year or two years ago or when.

Zephaniah was at the land they rented on Allsides. They rented  $\frac{3}{4}$  acre there. They lived alone in the house. The house about  $\frac{5}{4}$  acres round it had been left them by their father. The uncle Sylvester paid the taxes "up to here".

The  $\frac{3}{4}$  acres round the house is well fruited with coffee, fruit, ackee, mangoes, corn.

He is an Anglican but he does not go to church. He likes school. He is in the 4th Standard.

He uses the Dandelion seeds for tea.

He showed us with interest his pig. He seemed more interested in animals than in the land.

He says the ~~xxxxxx~~ district here is Mount Tappy. It begins just below his uncle's house - he does not know exactly the boundary. But the children from far in the woodlands on the Mount Tappy road come to school in Warsop.

The cane field on the opposite side of the road belongs to his uncle Sylvester.

-----  
Informant Mrs. Foster /Mrs. Edith Green's mother/

Lionel /brother of Sylvester Green/ and Clementina Green died a couple of years ago. They left 7 children. Three are with Clementina Green's brother in Mandeville. The eldest works in a bakery there and two small stay at home. Two youngest children took Mrs. James Maclean. They were no relatives of hers - just friends. The two boys Alvin and Basil /probably Zaphaniah in census/ are staying alone in the house left by the parents which is next door to Sylvester Green. They live alone, cook for themselves. The elder works the land and for other people. The younger /Alvin/ goes to school and also works. They have about 1 acre of land. The uncle Sylvester "looks them over". Now Sylvester is ill so he can't do it. The youngest child of Lionel and Clementina was on a visit with Mrs. Foster at Sylvester Green. She is not yet 2 years old.
