

BOX 6 JAMAICAN SERIES: WARSOP--FAMILY RECORDS 1-180

BOX DESCRIPTION: The Warsop Family Records, by the Obrebskis' own estimate include approximately 25 percent of the total households in Warsop. The 180 family records are contained in 1 box of 24 folders, including 1 folder of the original indices to the family records. The family records are typed carbons of the field notes collected by the Obrebskis, Edith Clarke and junior staff in 1947. In 1948, Madeline Kerr returned to Warsop to collect additional data, but her work is not available in this collection.

The Warsop Family Records should be used in conjunction with Warsop Census Forms 1, 2 and 3 of 1943 (BOX 16). Family records are identified by number and by reference to police district (P.D.), census subdistrict (S.D.) and household number in Population Census, Form 1. Generally, the family records contain basic census information on household members. However, since the Warsop Census Forms were available in 1947, the census data in the family records is sometimes incomplete, only serving to update the 1943 Census Forms. In addition to census data, family histories and comments on a variety of contemporary individuals and events were regularly collected and incorporated into the family records.
